BATTLEFIELD

CAT RENTALS℠

Rental & Supply Catalogue

1-800-RENT-CAT | BattlefieldEquipment.ca

WHY RENT
FROM BATTLEFIELD EQUIPMENT RENTALS

Minimize Costly Breakdowns
Our fleets are loaded with newer, reliable equipment that is put through a rigorous maintenance routine by trained mechanics prior to each rental to ensure the most productive and reliable equipment possible reaches your job site.

Complete Your Job More Efficiently
Expect the latest technology from Battlefield Equipment Rentals. We rent Caterpillar and other top quality brands of equipment utilizing the most innovative ideas available today. You will be using the right equipment to get the job done right. No more "just getting by" with the wrong equipment.

No Equipment Obsolescence
Equipment ownership can be costly. The value of equipment depreciates over time. Renting from Battlefield Equipment Rentals allows you to use the latest technology equipment without the concern of costly depreciation. No more trying to get the job done with old, worn-out equipment.

No Capital Investment
Renting frees up your business' capital. An expense is only incurred for the equipment when it is needed for a particular job. The extra capital you save by renting equipment from Battlefield Equipment Rentals can be applied to the other demands within your business so you can grow profitably. Release your business from the costs associated to equipment ownership.

No Maintenance Costs
Now you can eliminate costly service shops, service tooling, spare parts and those cumbersome maintenance records. We do it all for you. Our rental agreements typically cover complete maintenance of the equipment, so you don't have to.

Eliminate Storage Costs
No need to maintain a storage yard. Just give us a call for quick pick-up or simply drop off the equipment at the nearest Battlefield Equipment Rentals location when you've finished using it. We'll take care of the equipment storage.

Expect Responsive Service
Our team can knowledgeably consult you on equipment and applications. We will work to become your trusted rental source and make your job easier. We are only a phone call away.

Try It Before You Buy It
You may be considering buying a certain model of equipment and would like to operate it on your job to make sure it suits you before making that potential purchase. What better way to thoroughly try out equipment than to rent a similar machine from the large selection of equipment at Battlefield Equipment Rentals.

Supplement Your Core Fleet
Your job requirements are always changing and you need to stay up with your customers demands. You may not always have the right equipment to complete the job, but we do. Rely on Battlefield Equipment Rentals to quickly supply the equipment you need to get the job done.

Bottomline:
Battlefield Equipment Rentals is fast, easy, cost-effective and there when you need us. Call 1-800-RENT-CAT to discuss your equipment needs with one of our Rental Specialists today.

SAFETY TIPS

FOR CONTRACTORS WHO RENT

No two construction sites are the same. Traffic patterns vary, as do the slopes and grades of the jobsite. Different types of equipment come and go. And of course there can be more than one subcontractor on the job. These variables can make safety a challenge. But that challenge can be met by following simple, yet crucial, safety rules. Your commitment to safety must be consistent. Take steps to make your site - and those around you - safer.

Wear seat belts

Operators of construction equipment are not typically traveling at high speeds, and traffic is limited. Still, there are other working machines - and equipment sometimes needs to use or cross a public road. But seat belts do much more than protect the operator in the event of a collision. They also keep workers inside the cab's rollover protection structure (ROPS). And in many cases, construction equipment is more likely to roll over than be struck by another vehicle. The underfoot conditions can be unstable, and the operator can encounter a berm, ravine or a dropoff from a road to a drainage ditch. Any of these hazards can lead a machine to roll—as can loading and unloading. Staying buckled up keeps you in the ROPS—and keeps you safe.

Properly enter and exit machines

Start by taking the proper approach. Always face the equipment, and use the steps and rails provided by the manufacturer. Make sure contact areas are clear; that steps and handrails are properly secured and free of mud and debris; and that the area is adequately lit. Maintain three points of contact when mounting or dismounting. (Either one hand and two feet, or two hands and one foot, should be on the steps/handrail.) Make sure footwear is clean, and that hands are free of tools or anything else that could encumber the process.

Make the shop safe

Repairing equipment requires caution. Turning off equipment should be obvious. But have you put all safety locks in place? Keep guards and shields on power equipment—they're installed for a reason. Proper ventilation and lighting helps prevent injury. And speaking of lighting … is the shop properly wired? Using Ground Fault Circuit (GFC) interrupters will help prevent electrical shock. Keep the place clean, too. An organized workshop makes it easy to find the right tools and prevents heavy objects from falling; a clean floor helps you avoid slips and falls. Eye protection is a must.

Know where underground lines are buried

It's easy to do. In fact, you can have utility lines marked at your future jobsite by contacting your local municipality. Potential underground hazards will soon be marked at your future jobsite. And this is a FREE service within most municipalities. Make sure you call before every job - period! The safety of your crew, as well as a hefty fine, is too big of a risk to take.

Recognize the hazards

Start by looking around you. Are there overhead lines or other potential electrical hazards? Are there steep slopes, or space issues? Are employees riding on the outside of moving machines? Many dangers are obvious to those who are open to spotting them. If you see a potential problem, but are not sure, ask. Make hazard recognition second nature by: reviewing safety procedures daily; helping new workers learn what to look for; conducting toolbox talks, participating in other forms of training; and showing a willingness to address the concern. In other words … be committed; don't leave safety in the hands of someone else. It's your responsibility to take corrective action.

Secure loads properly

Refer to the operator's manual for guidelines on proper loading and transport procedures. Make sure trailers are properly hitched to the towing vehicle. Use safety chains, and make sure signal lights work properly. Inspect tires before each use. If the trailer has brakes, inspect them daily and make sure all connections are intact. Always make sure the brakes are locked before loading. Load and unload on level surfaces. Use tiedowns or chain binders to secure loads to the trailer. Check bindings after you have traveled some distance to be sure the load has not shifted. Load trailers properly - put about 60 percent of the load toward the front. (Too little weight in the front will cause the trailer to fishtail; too much weight will cause the hitch to drag and may raise the front of the towing vehicle, which reduces steering control.) Sweep the decks free of dirt, stones and debris before traveling. Wipe up any oil.

Wear the proper clothing

When it comes to clothing, keep it tight. Loose clothing can get caught in machinery - especially when working around augers or implements. Wear the proper footwear - not only to protect feet from falling objects, but to prevent falls. Construction sites can be slippery places, and boots with good traction are the first line of defense. (Also make sure the boots are high enough to protect your ankles.) Gloves and long pants prevent cuts and scratches that can be uncomfortable - and in some cases can become more serious. Don't forget to wear your safety glasses or face shield.

Make safe work tool changes.

Understand the warning labels regarding the forks, buckets and other work tools on your jobsite. Know the maximum operating capacities and specifications of the host machine and its lift capacity restrictions. Also make sure you're aware of work tool clearance when operating near obstacles, including those that are overhead, such as tree branches and power lines. Before making a work tool change, check the hydraulic hoses and fittings on both the tool and the host machine. Once installed, operate the tool slowly in an open area to make sure all components are working properly (and not leaking).

Conduct pre-shift walk-arounds

These inspections only take a few minutes, but they are one of the best ways to detect small problems before they become serious. Follow walk-around guidelines in the operating manuals, which should be kept on machines. (Supervisors must allow time for a thorough evaluation.) Start by making sure the machine is clean. That means no grease, oil or hydraulic fluid on the steps, railings or controls. Keep windows clean inside and out for clear visibility. On the outside, check for accumulating debris—such as straw, branches and grass - that could be susceptible to fire. Besides debris, you're looking for leaks, cuts, cracks, rubbing or excessive wear. Use your senses: sight, smell, hearing and touch. Have your operators do quick walk-arounds any time they get off the machines, and again at the end of a shift. Pass all relevant information to other operators and a supervisor.

Establish a culture of safety - and a commitment to training

Prepare a safety manual or safety sheet for the specific conditions found on your site or in your shop. Ensure that all equipment is used for its intended purposes, and forbid removal of safety guards or other protective gear. Retain material safety data sheets for bulk fluids and chemicals. When appropriate, make sure instructions are translated and clearly understood by all workers. Provide regular safety training and conduct weekly training meetings even if you are working in the field. Be certain new workers have been trained before they start working. Give experienced operators a chance to adjust to new machines - and to go through any training needed to assure maximum proficiency. Have them review the OMM to make sure they understand the basics before putting them to work on unfamiliar machines.

This information is not intended as a comprehensive analysis of all hazards related to the product you have rented from Battlefield Equipment Rentals, or to your specific application. More complete information is provided in the Operation & Maintenance Manual (OMM) for specific models. Battlefield Equipment Rentals recommends you and your employees read and understand the OMM before operating or working on any machine.

EARTH MOVING EQUIPMENT

SKID STEER LOADERS

Cat® Skid Steer Loaders are designed and built for maximum performance and safety. We are constantly developing and refining advanced power and hydraulic technologies to ensure that our Skid Steer Loaders provide customers with the power, versatility, efficiency, ease of operation and reliability they have come to expect from Cat Equipment.

COMPACT TRACK & MULTI TERRAIN LOADERS

Cat® Compact Track and Multi Terrain Loaders, with their suspended, rubber track undercarriage, offer exceptional versatility, flotation, traction and stability over a wide range of conditions and terrains.

HYDRAULIC EXCAVATORS

You can count Cat® excavators to deliver top performance, unmatched versatility, and the industry's best fuel efficiency. You'll also love their ease of operation, their durability, and their latest safety and technology features that will make you the model of productivity.

COMPACT WHEEL LOADERS

Whether you need a wheel loader for use in landscaping, agricultural, construction, waste management, forestry, or mining applications - Caterpillar® wheel loaders make your material handling and loading jobs safer, faster, more precise and profitable.

CATERPILLAR® WORK TOOLS

Work Tool Attachments tailor compact machines to the specific requirements of a customer's working needs. Caterpillar work tool attachments enhance productivity and utility of compact machines, equipping them for a wide range of tasks and operating requirements, and providing total system solutions for any job application.

EARTH MOVING, MATERIAL HANDLING & COMPACTION

BACKHOE LOADERS

With standard pilot-operated joystick controls, a more comfortable operator station, extendible stick design and increased performance, Cat® Backhoe Loaders allow you to get more done with less effort.

DOZERS

These crawler dozers are ideal for residential construction performing such tasks as clearing and grading lots, sloping the sides of roads, backfilling, and final grade work for landscaping and driveway construction.

TELEHANDLERS

Cat® Telehandlers are highly versatile machines, designed to deliver maximum performance with traditional Cat reliability, durability and productivity in the toughest working conditions.

FORKLIFTS

These gasoline and dual fuel powered pneumatic tire lift trucks provide a more attractive operator environment, as well as a more efficient one. These models range in capacity from 5,000 to 7,000 lbs. and come fully equipped with a comprehensive package of high performance and operator comfort features.

ASPHALT ROLLERS

Large double-drums are easy to set up for maximum compaction efficiency on any type of mix. Utility and Combi compactors provide excellent compaction performance on a wide range of urban and commercial applications.

VIBRATORY SOIL COMPACTORS

Cat® Vibratory Soil Compactors are durable and reliable. They offer high compaction performance, speed and gradeability to maximize productivity on a wide range of applications. Available in smooth drum models for granular soils and padfoot drums for semi-cohesive and cohesive soils.

LIGHT COMPACTION

VIBRATORY RAMMERS

The outstanding features of vibratory rammers are the compact design and high performance. The long shoe stroke, high percussion rate and high stroke energy combined with fast advance travel achieve excellent results.

GAS & DIESEL PLATE COMPACTORS

Reversible Vibratory Plates are designed for compaction of sand and gravel, crushed aggregate as well as mixed soils with some cohesive content. Ideally suited where forward and reverse operation is required, such as in trenches and backfilling along foundations.

TRENCH ROLLERS

Trench rollers feature a dual joystick control box for easy steering. This "Smart Control" system uses an infrared signal with line-of-sight control for added safety. If the operator comes within five feet (1.5 meters) of the roller's front or rear sensing eye with the control box, the unit will stop moving and vibrating. A smart machine for any jobsite.

WALK BEHIND ROLLERS

This walk-behind, double drum vibratory roller is capable of performing a wide range of soil and asphalt compaction applications. The exclusive compact design allows for tight side clearance on both sides of the roller. Plus the totally hydrostatic drive eliminates mechanical components providing for less maintenance and greater reliability.

CALL 1-800-RENT-CAT TO REACH YOUR LOCAL BATTLEFIELD EQUIPMENT RENTALS LOCATION

HIGH VOLUME TRASH PUMPS

Heavy-duty self-priming, centrifugal trash pumps have the muscle and stamina to handle the really tough pumping jobs. When stones, sticks, rags and construction debris clog other pumps, trash pumps take over. Depending on the model, they can pass up to 4" diameter spherical solids.

SUBMERSIBLE PUMPS

Submersible pumps have overcome the conventional limitation of 25 foot suction lift, making them ideal for high head/high volume applications. They operate quietly and unattended below the water surface, which makes them less prone to weather and vandals.

TRASH PUMPS

Light-in-weight, self-priming, centrifugal utility pumps are engineered to help reduce on-site gas consumption while delivering the high performance you need to get the job done fast.

PRIME AIRE TRASH PUMPS

Prime Aire Trash Pumps are equipped with an auxiliary priming system to ensure automatic prime and reprime, and feature an oversized, oil-lubricated silicon-carbide mechanical seal which allows the pump to run dry intermittently without damage.

AIR COMPRESSORS & AIR TOOLS

SMALL AIR COMPRESSORS

Designed for road and public works contractors, public utilities and municipalities who need compressed air to power breakers, chipping hammers, sandblasting and other equipment.

DIESEL AIR COMPRESSORS

Portable diesel air compressors are compact, efficient, economical and easy to operate. A reliable source of compressed air to drive your pneumatic tools, as well as high free air delivery applications such as sandblasting.

AIR COMPRESSORS UP TO 1,600 CFM

The latest series of portable air compressors builds on that know-how giving as a result, a heavy-duty series of compressors that are built to work, and work hard.

AIR TOOLS - CHIPPERS & RIVET BUSTERS

These are effective, reliable tools for fettling of castings, chipping operations in the mechanical industry, hole making and light demolition of concrete.

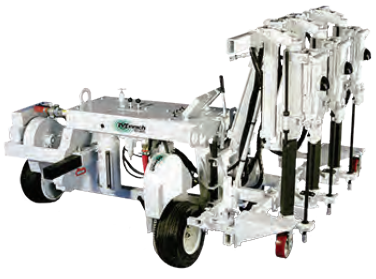

AIR TOOLS - BREAKERS & ROCK DRILLS

Pneumatic breakers are ideal for general demolition, but not for use in very hard materials or heavily reinforced concrete. Rock drills are designed for bench drilling, secondary drilling and smooth blast drilling.

SINGLE & 3-GANG DOWEL DRILLS

Multiple-drill self-propelled units with skid steering offer highly productive on-slab drilling solutions. Capable of horizontal and vertical drilling.

SANDBLAST POTS & EQUIPMENT

Portable sand blasters have proven themselves in countless industrial applications as strong, versatile and dependable machines. Built for the toughest blasting jobs.

MACLEAN MDA HYDRAULIC EXCAVATOR ROCK DRILL

From quarrying operations, to secondary breaking, to construction drilling, the MDA Excavator Rock Drill can do it all. Mounted on a Mini-Excavator and connected to a diesel air compressor.

CALL 1-800-RENT-CAT TO REACH YOUR LOCAL BATTLEFIELD EQUIPMENT RENTALS LOCATION

SITE POWER, LIGHTING AND TRAFFIC CONTROL

PORTABLE GENERATORS

Portable generators offer the flexibility to power tools and other applications in the middle of a jobsite where electricity is unavailable.

Gas generators up to 2.5 - 6 KW are available.

DIESEL & HYBRID GENERATORS

Our Mobile line of generators fulfill larger power needs, while maintaining exceptional mobility. Built for reliability and toughness, they excel in the most extreme conditions - delivering power wherever and whenever you need it.

Generators up to 125 kW / 600V are available.

LIGHT TOWERS

A mobile light tower package that includes a Diesel engine attached to a generator wired for 120/240 volt, single phase. Package includes four (4) 1,250 watt Metal Halide floodlights mounted to a 30' four section galvanized manual telescoping tower.

WELDERS

The Classic 300D is a pure DC generator arc welder that is great for pipeliners & contractors. The unit offers 300 amps with five current ranges. The Commander 500 features advantages of Chopper Technology to control the DC welding output and create an arc with superior welding performance.

ARROW BOARDS

Arrowboards provide very easy and simple operation. The portable, changeable arrow boards are designed to offer the travelling public simple directions for lane closures and traffic directions.

MESSAGE BOARDS

The portable, changeable message boards are designed to offer the travelling public as much information as permanent signage, yet do it much more simply and flexibly.

PORTABLE TEMPORARY TRAFFIC SIGNALS

Portable temporary traffic signals provide safety in work-zones, cross roads and intersections. Set-up can be done by one person in just minutes with minimal training required.

CONCRETE PRODUCTS

POWER TROWELS

Ideal for floating and finishing concrete surfaces, power trowels are rugged and designed for tough trowel jobs in harsh conditions.

FLOOR SAWS

Our extensive range of flat saws includes productive saws for floors, driveways, highways, streets, runways, new and old concrete and asphalt.

CONCRETE SAWS

Our extensive inventory means you can always find the right concrete saw to get any job done, with maximum efficiency.

CONCRETE VIBRATORS

The ultimate in hand-held powered vibration, our vibrators are light-weight, but powerful and provide excellent consolidation of concrete.

HIGH CYCLE CONCRETE VIBRATORS

High-cycle vibrators are used with low-slump concrete where consistent power is needed to work a stiff mix into corners, around rebar and remove entrapped air pockets.

CONCRETE SCREEDS

Fast and easy to use, this high-frequency screed provides uniform distribution over the entire blade length, enhancing structural integrity of the concrete through consolidation.

CONCRETE BUGGIES

The high density poly bucket is impact resistant and designed to withstand the toughest use. Handling is simplified with convenient lifting points.

MORTAR MIXERS

From a small wheelbarrow style to a heavy-duty totally enclosed gear drive mixer, Battlefield Equipment Rentals has a full line of mortar mixers.

CONCRETE MIXERS

At home, on the farm and on the construction site, these thick steel drum mixers will stand up to a lot of pounding.

CONCRETE SPRAYERS

Cure concrete with Battlefield Equipment Rentals' line of hand-held concrete sprayers.

CORING DRILL

Battlefield Equipment Rentals offers various sizes of coring drills. Our units have a small anchor base and carriage, and wheels for better mobility.

FLOOR GRINDER

Battlefield Equipment Rentals' line of floor grinders combines performance and dependability to tailor a solution for every surface preparation need.

SONOTUBES

Battlefield Equipment Rentals carries a full variety of sonotubes in all sizes that you will need for your project. Newform concrete forming tubes combine strength, value and ease of handling, making them the ideal forming method for concrete columns, footings and piers.

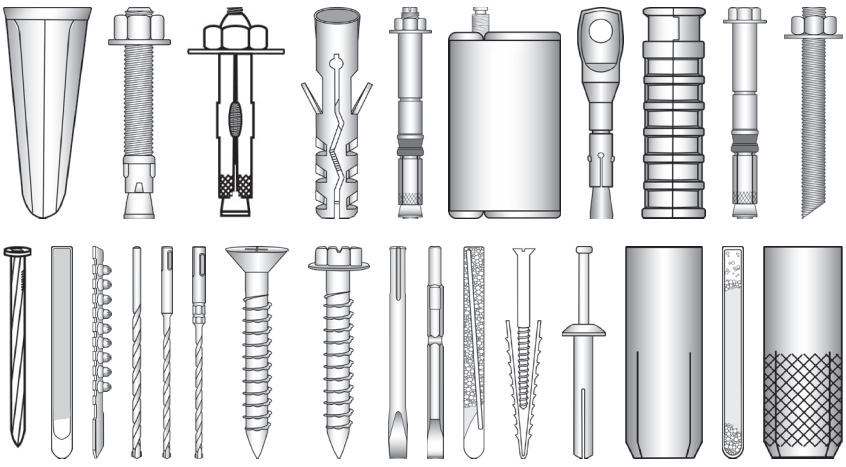

FORM HARDWARE

Battlefield Equipment Rentals has a full stock of concrete form hardware, inserts, anchorages and accessories for the construction industry.

FASTENERS

Battlefield Equipment Rentals is especially well equipped to supply many types of application-specific anchors. Custom sizes and protective coatings are available to meet design requirements. The Battlefield Equipment line of anchors and fasteners for the construction industry is perhaps the most extensive available and it includes several unique products. In addition, Battlefield Equipment Rentals is exceptionally well equipped to supply special devices, sizes, and finishes when required.

CLIMATE SOLUTIONS

DIRECT FIRED HEATERS

Featuring electronic ignition, thermostatically controlled heat, quick changeover from propane to natural gas, easy relocation with wheels and hooks, direct fired heaters are the ultimate in portable heating that brings instant summer to the winter workplace.

Available from
100,000 - 2,250,000 BTU.

INDIRECT FIRED HEATERS

Durable and versatile for all heating applications, these medium duty air heaters bring efficient heat to various workspaces. They offer up to four times more static pressure and double the CFM of traditional air heaters.

Available from
170,000 - 2,000,000 BTU.

RADIANT HEATERS

The radiant construction heaters emit radiant heat in all directions. It warms surfaces, not air.

The surface areas of an enclosed room or frozen basement are heated very quickly.

HYDRONIC SURFACE HEATERS

Thaw ground quickly, easily and economically like it's summer. With hydronic surface heaters from Battlefield Equipment Rentals, you are able to avoid jobsite down time by excavating, pouring and curing concrete all winter long.

Available from
150,000 - 900,000 BTU.

HYDRONIC (GLYCOL) HEATERS

Powerful liquid-to-air heat exchangers bring clean, dry, heat to your workspace. Simply position the heat exchangers inside the structure and distribute heat where required.

Heaters available from
400,000 - 1,800,000 BTU.

Heat Exchangers available from 50,000 - 600,000 BTU.

INDUSTRIAL INDIRECT FIRED HEATERS

These units bring in filtered outdoor air and heat it through an indirect gas-fired tubular exchanger.

They maintain balanced pressure, steady airflow, and uniform temperatures. Suitable for both indoor and outdoor applications.

Available from
170,000 - 2,000,000 BTU.

DEHUMIDIFIERS & AIR MOVING UNITS

Our industrial dehumidifiers are high capacity units that provide quick, efficient dehumidification in extreme conditions of flooding and moisture problems.

Air movers will help reduce heating costs by increasing the air circulation. They are very easy and safe to operate with expanded metal safety guards, lifting handles and a molded power cord.

AIR CONDITIONING (DUAL TEMP) UNITS

Quiet operation (55–60 dB) with energy-efficient compressor and eco-friendly R32 refrigerant. Features include dual temperature display, built-in heat and condensate pumps, overload/overheat protection, aluminum fin condenser, centrifugal turbine fan, removable duct, and cETL certification for reliable performance.

Available in 1 ton and 5 ton units.

VECTOR AIR COOLING UNITS

Vector units cool areas up to 2,200 sq. ft. with wind speeds of 48–64 km/h, reducing temperatures by up to 13.9°C while using water-based cooling for eco-friendly, energy-efficient operation. Proprietary Cross-Flow Smart Technology ensures optimal airflow with intuitive controls and quiet performance at 59 dB. Built with marine-grade, rust-proof materials and a fully enclosed 57 L water reservoir, they offer durability, hygiene, and child safety. Compact and portable, each unit measures 24" × 20", weighs 135 lbs, fits flush against walls, and includes all-terrain castors for easy mobility.

Air Delivery	9,000 CFM
Velocity	60 km/h +
Power Usage	100–1000 W
Input Voltage	100–240 V
Utility Frequency	50/60 Hz

CONSTRUCTION LASERS & SURVEY SUPPLIES

EXTERIOR FLAT LASERS

Exterior flat lasers are used for checking/ setting elevations, basic slope work and excavation. Fully automatic self-levelling capabilities, along with superior drop and weather protection means less downtime.

INTERIOR CEILING / WALL LASERS

Interior Ceiling / Wall Lasers are used for levelling and aligning, interior wall layout and installation of ceilings.

PIPE LASERS

Pipe Lasers are used in installation of gravity flow sanitary and storm sewer pipelines along with pipe jacking and tunnel boring.

POCKET SPOT LASERS

Spot Pocket Lasers are ideal for a range of applications including installing fixtures, putting in walls and levelling foundations.

SINGLE SLOPE LASERS

Slope Lasers are automatic self-levelling lasers that do three jobs: level, grade and vertical alignment with plumb.

ELECTRONIC BAR LOCATORS

Our magnetic locators include a multitude of convenience features, like LCD visual display and/or audio tone, a lightweight, easy-grip design, & water resistant cases.

AUTOMATIC LEVELS

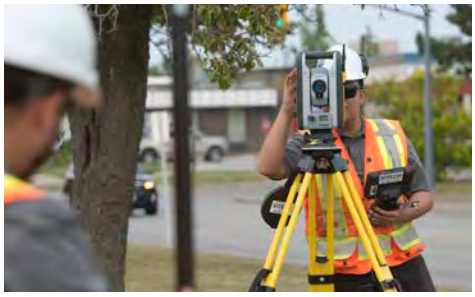

Automatic Levels are used for two-person levelling across the jobsite, levelling forms and footers, checking elevation along with a variety of other applications.

TRANSITS / THEODOLITES

Designed for general construction and survey applications, electronic digital theodolites give accurate measurements in an easy-to-use platform.

TOTAL STATIONS

From high-order control surveys to topographic data collection or fast-paced construction stakeout, our Laser Stations quickly and reliably increase your staking productivity.

LANDSCAPING EQUIPMENT

PRESSURE WASHERS

Pressure washers are ideal for cleaning driveways, building exteriors, patios, porches, fences, large decks and vehicles.

LOG SPLITTERS

Battlefield Equipment Rentals offers log-splitters that allow you to split wood on both the forward and reverse strokes allowing for higher production.

WOOD CHIPPERS

Wood chippers allow you to tackle tough brush chipping projects. These units are available in a variety of sizes to fit your project requirements.

CHAINSAWS

Battlefield Equipment Rentals offers a full line of electric, consumer, semi-professional, professional, and specialty saws, to meet a wide range of cutting needs.

LEAF BLOWERS

Clear debris from patios, driveways, lawns, and all the hard to reach places around the home and jobsite. Battlefield Equipment Rentals also offers back-pack blowers to tackle any project, large or small.

PAVER PLACERS

Install up to 700 sq. ft. of pavers per hour with UniLyft. Quickly place pavers & walls fast, accurately, and effortlessly, while reducing labour costs. Reduce shoulder, hand and knee pain, and injury.

ROTO TILLERS

Battlefield Equipment Rentals' line-up of Roto Tillers provides the power and maneuverability for every kind of tilling job.

SOD CUTTERS

Sod cutters offer good balance, easy handling, and easy depth and blade angle adjustment for varying soil conditions that last through the toughest conditions.

LAWN MOWERS

We have a full line of lawn movers that offer maximum mowing performance and flexibility for all sized projects.

LANDSCAPING EQUIPMENT

WHEEL BARROWS

Available in all sizes. Large or small applications, Battlefield Equipment Rentals has the proper size for your application.

AERATORS

Full-featured and highly maneuverable, Battlefield Equipment Rentals' line-up of aerators deliver precision coring.

STUMP GRINDERS

A line-up of machines that are tough, reliable and easy to operate, and have been proven on virtually every type of hardwood stump.

AUGERS

Battlefield Equipment Rentals offers a full range of augers in gas, hydraulic and manual powered units for all sized projects.

SNOW BLOWERS

Battlefield Equipment Rentals offers snow blowers that clear large paths of snow for quicker job completion.

STRING TRIMMERS

Electric & gas trimmers are ideal for trimming hard to reach places along the side of a house or garden, around tree trunks and under bushes.

HEDGE TRIMMERS

Battlefield Equipment Rentals offers a full-line of hedge trimmers designed for a variety of purposes from parks and landscape gardening, to large gardens and estates.

SWEEPERS

Complete line of walk-behind sweepers for all applications, from sidewalk and driveway sweeping, to snow removal and outdoor cleanup.

TRENCHERS

From pedestrian to machine attachment, Battlefield Equipment Rentals has the proper size trencher for your trench digging application.

ROTO & DEMO HAMMERS

Battlefield Equipment Rentals' line of rotary hammers and demolition hammers can cope with any situation, no matter how tough the material.

BREAKERS

The breaker is designed for breaking concrete, cutting asphalt, tamping ballast, digging and other tasks, offering sustained durability and minimal down time.

DRILLS

Regardless of medium - masonry, wood, metal tiles or composite materials, Battlefield Equipment Rentals has the proper drill for all applications.

HAMMER DRILLS

With high-performance and high operating comfort, Battlefield Equipment Rentals' line of hammer drills make even the hardest drilling work easy.

GRINDERS

Whether you are grinding or cutting in concrete, masonry, or stone, we have the proper grinder for your needs.

PLANERS

A full line for fast and precise working that allows you to smooth surfaces or reduce wood faces and edges.

ROUTERS

The router is ideal for rebating, grooving and recessing work in workshops or on site.

SANDERS

A powerful sander that sands flush to an edge and is suitable for all heavy-duty operations.

CIRCULAR SAWS

A hand held saw for general woodworking. Adjustable depth of cut and angle cutting facility. Ideal for precise straight, cross and mitre cuts.

ELECTRIC TOOLS

DRYWALL SCREWGUNS

Drywall Screwguns are designed for fast, accurate installation of self-drilling fasteners.

WRENCHES

Impact Wrenches deliver strong sudden torque for larger nuts and bolts that are frozen on, or over-torqued.

MAGNETIC DRILLS

This combination unit features an adjustable position, variable speed base and a 1-3/4" drill motor.

BAND SAWS

Band Saws are ideal for woodworking and metal working. With high torque and powerful motors these band saws will maintain a steady, optimum blade speed.

JIGSAWS

Jigsaws are ideal for cutting curves into pieces of wood or metals. Variable speed dials, bevel cuts, lock on button for extended use, low noise and low vibration for extra accuracy & steady handling.

METAL CHOPSAWS

Chop Saws are designed to make quick, accurate crosscuts in a workpiece. Powerful motors and durable designs ensure quality and reliability.

MITRE SAWS

With a combination of accuracy and flexibility these saws are ideal for shop-fitters and joiners.

TABLE SAWS

Ideal for general purpose site-work, ripping down sheet material, sizing boards, cutting shuttering and fencing.

RECIPROCATING SAWS

The reciprocating saw is used for rough cutting and demolition tasks, such as cutting through rebar or support beams.

FUEL CONTAINERS

Reduce fleet downtime with portable fuel containers that meet all federal regulations.

QUIKDRIVE SCREWGUNS

Auto-feed screw driving systems are ideal for a broad range of fastening applications because they feature quick-loading screw strips, precise countersink adjustment, and a patented auto-advance mechanism.

WET / DRY SHOP VACS

Provides maximum power for the heavy-duty pick up of water & debris in the shop, basement, garage or on the job.

PIPE THREADERS

Manual or power, large or small, Battlefield Equipment Rentals has a full line of pipe threaders to meet your needs.

PIPE WRENCHES

From the smallest circumference to the largest, we have heavy-duty pipe wrenches to fit them all.

POWER DRAIN AUGERS

For performance, cable control, durability, and manoeuvrability demanded by professional users, our line of power drain augers are ideal for any tough job.

DRYWALL PANEL LIFTS

The drywall panel lift is ergonomically designed to save your back and is easy to transport, assemble, and operate, making drywalling a one person job.

VINYL TILE CUTTERS

ALUMINUM & FIBERGLASS LADDERS

Battlefield Equipment Rentals carries a full line of aluminum and fiberglass industrial Class 1A step ladders (6' - 16' heights) and Class 1A extension ladders (16' - 40' heights). Units are sold new, or available for rent.

SCAFFOLDING

Scaffolding is temporary framework used to support people and material in the construction or repair of buildings and other large structures. Battlefield Equipment Rentals' modular system of metal pipes comes in a variety of lengths to meet individual needs. Couplers to hold the tubes together and boards to provide a working surface for users are also available to meet individual needs.

NXBURST ROCK BREAKING TECHNOLOGY - THE BETTER WAY TO BREAK ROCK & CONCRETE

Breaking rock and concrete in confined or sensitive areas is no longer a problem. Break rock and concrete with minimal fly rock, low vibration, reduced noise and requires only localized clearance of equipment and personnel. The unique characteristics of the NXbursT™ cartridge make it the product of first choice in any rock breaking application or demolition site in environmentally sensitive areas, or in close proximity to existing infrastructure.

NXbursT™ cartridges are available in 12mm, 28mm, 34mm and 60mm diameters; and in charge-weights from 2g to 500g. The large range of sizes and charge weights allow NXbursT™ to be used for a wide range of civil excavation and mining applications.

AERIAL WORK PLATFORMS

INDOOR SCISSOR LIFTS

In terms of reliability and agility, our equipment is second to none in both industrial and slab-type applications. With battery and dual fuel units, and driveable at full height, our scissor lifts rise above all challenges wherever mobility and high reach requirements are a factor. 14' to 50' models available.

ROUGH TERRAIN SCISSOR LIFTS

Rough terrain scissor lifts boast impressive platform capacities and industry-leading gradeability (up to 50%). With crossover symmetrical four-wheel drive, these machines deliver maximum torque to all wheels for superior all terrain performance.

TELESCOPIC BOOMS

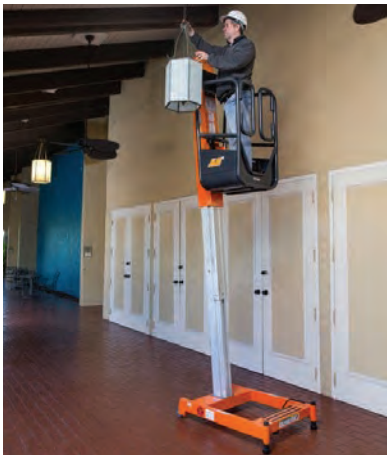

Telescopic booms offer greater horizontal outreach than any other type of aerial platform — perfect for areas with limited access in construction and industrial applications. Telescopic booms are also designed for productivity with the traction and drive speed you need to get around the job site and to the work area.

ARTICULATING BOOMS

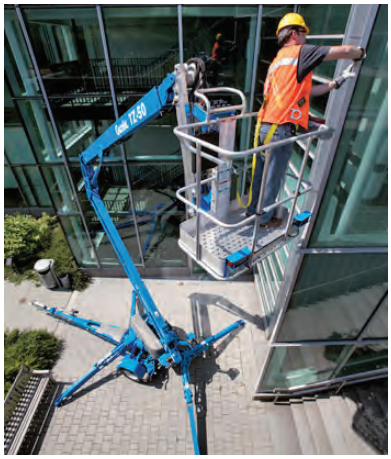

Ideal for outdoor construction and industrial applications, engine-powered articulating booms provide lifting versatility with a combination of up, out and over positioning capabilities and outreach that's second to none.

PERSONAL PORTABLE LIFTS

Personal portable lifts offer facility maintenance workers a secure platform and the ability to work 360 degrees with both hands. Personal portable lifts can be assembled in just minutes, are extremely portable and feature a convenient tool tray. It's a safer choice for plant and facility maintenance projects.

TRAILER-MOUNTED BOOMS

Trailer-mounted booms feature an outstanding operating envelope, making them ideal to reach jobs high and low. With easy-to-tow mobility and simple pictograph controls, it's no wonder that trailer-mounted booms take productivity to new heights.

CALL **1-800-RENT-CAT** TO REACH YOUR LOCAL BATTLEFIELD EQUIPMENT RENTALS LOCATION

COMPLETE RENTAL FENCE SOLUTIONS

Battlefield Equipment Rentals is a proud distributor of Modern Fence in Ontario for all your jobsite fencing needs. Convenient, safe and reliable rentals. Call for a quote today.

Rental Fence for Construction Sites

Our rental fence is not a chain link fence, but a much more stable and secure welded metal panel using an interlocking system. The panels have a powder coated yellow finish, which is more visually appealing than the standard metal fence. The fence panels are extremely sturdy and stable, and are installed as a free standing system. Gates for vehicles or personnel can easily be installed in any location in the fence line.

Rental Fence Installation

Our rental fence system is not only the most superior product on the market, but we also put forth a fully certified and qualified operators team that executes delivery, installation and removal of the fence on your site. Our staff go through an extensive training program that fully educates them all about the safety procedures on the road and on your site, ensuring an injury free environment. Proper safety techniques are used during installation, and our staff are fully equipped to handle any concerns or questions regarding the fence or safety accessories.

Propane Storage Enclosures

Propane storage enclosures are available in many sizes and configurations starting at 10' x 10'. Separation for full and empty cylinders, gates and signage will help keep your site clean and compliant. Our set price includes set-up, take down and delivery.

Garden Centre Compounds & Christmas Tree Lots

Our rental fence system offers a safe and secure storage compound for seasonal products, such as Garden Centre Compounds or Christmas Trees. Our gates and fencing will keep your site accessible, clean and organized throughout the season. We can also set-up our fence panels to help provide separation of seasonal products and supplies, providing a customer friendly environment. Our rental fence can be customized to any size you desire, and can be installed on any terrain.

Limit Visual Access with Privacy Screening

Some occasions call for a measure of security or intimacy from the general public outside the perimeter of the grounds. Common examples might include concerts, beer gardens, or VIP compounds. We can install a privacy screen during the initial installation that will provide approximately 90% visual blockage.

COMPLETE TRENCH & SHORING SOLUTIONS

Battlefield Equipment Rentals is a proud distributor of Kundel Industries trench boxes and shoring equipment in Ontario and Efficiency Productions in the Maritimes and Quebec. Convenient, safe and reliable rentals. Call for a quote today.

KUNDEL PRODUCTION SAFETY SYSTEMS

EFFICIENCY PRODUCTION America's Trench Box Builder

SPECIALTY SOLUTIONS

Reliable Jobsite Solutions

Renting trench shoring equipment creates flexibility and efficiency for projects. It's cost effective, sparing you from storage and maintenance costs. Try out the equipment before buying, as renting has no risk or extra costs. We'll work with you to create a rental plan that suits your business, handle maintenance, and deliver equipment to your site, saving you money, time and hassle.

Steel Trench Boxes

- Kundel Titan Series 6
- High Strength Mill Certified Steel
- Depth Rating Certification Tag
- End Posts w/ Integrated Collars
- Four-Point Lift System
- Thru-Wall Lifting Lugs
- Reinforced Top Rails
- Versatile options and accessories

Shorelite Aluminum Boxes

The ShoreLite™ aluminum trench box from Kundel and the Build-A-Box™ modular aluminum trench box from Efficiency can be assembled in minutes to a wide variety of two, three, or four-sided configurations. Both have an uncomplicated design that can be easily assembled by two people. The lightweight, extruded profiles are easy to transport and assemble in various configurations with standard required connectors.

Heavy Duty Bedding Boxes

Titan Stone Boxes and Efficiency Stone Mizers are designed for efficient pipe installation, ensuring that bedding material is always staged for quick and uniform installation. This boosts productivity and safety by eliminating delays and reducing pressure on trench walls. The both offer extra strength and durability with reinforced corners and tapered ends, reducing waste costs and and ensuring safety is priority.

Steel Road Plates

Crafted from superior strength steel plates, our road plates ensure safety for pedestrians and vehicles. They feature optional single or double flush-mounted lifting points for easy and balanced handling without protrusions above the plate surface. We offer many plate options, including plates with a non-skid surface, flush mounted, center-balanced, and plates with single lifting points.

COMPLETE PUMPING SYSTEMS & SOLUTIONS

Battlefield Equipment Rentals offers a comprehensive range of pumping solutions tailored for diverse applications including dewatering, emergency response, environmental management, and liquid transfer.

Our fleet includes high-performance submersible, centrifugal, and trash pumps designed to handle everything from construction site water removal to urgent flood mitigation, from top industry brands.

With flexible rental terms and expert support, Battlefield Equipment Rentals' dedicated Pump Solutions team ensures reliable, efficient fluid handling solutions for both planned projects and unexpected challenges across all of Eastern Canada.

Rentals

Diesel driven and electric submersible rental fleet are available in discharge sizes ranging from 4" to 12" and delivering up to 7,000 GPM. For applications in excess of this, our team is well trained on how to design parallel pumping schemes or series pumping to handle ultra-high head applications.

Our engine driven fleet is outfitted with Gorman-Rupp's Priming Assisted technology for continuous dry running, as well as heated priming chambers for work in winter conditions. Our pumps are all fully automatic, float operated and can handle up to 3" solids. Both open and critically silenced pump models are available.

Engine Driven Pumps

From Gorman-Rupp's dependable priming assisted (dry prime) pumps for your most difficult sanitary bypass application to our large PAH high-head pumps for deep quarry dewatering, our range of diesel driven pumps will have you covered for every application.

Size: **2" to 12"** | Max. Capacity: **15,000 GPM** | Max. Head: **560'** | Max. Solids: **3"**

Submersible Pumps

Over 400 submersible pump models, including submersible pumps for open pits and quarries, drilled wells and narrow openings, and solids-handling models for sludge & slurries.

Size: **2" to 12"** | Max. Capacity: **7,100 GPM** | Max. Head: **600'** | Max. Solids: **1"**

Piping & Accessories

- Pipes – HDPE, Galvanized
- Hoses – Cam-lock or Victaulic
- Manifolds, Flowmeters
- Fish screens
- Environmental spill berms

Localized Site Dewatering

Size: **2" to 4"** | Max. Capacity: **725 GPM** | Max. Head: **380'**

APPLICATIONS

Construction - Dewatering excavations, foundation work, bypass pumping, concrete mixing

Mining - Pit dewatering, slurry transport, tailings management

Quarries - Water removal from pits, dust suppression, aggregate washing

Pond Clean out - Sediment removal, water transfer, vegetation control

Dam Construction / Reconstruction - Cofferdam dewatering, water diversion, flood control

Municipal Services - Sewer bypass, storm water management, water main repairs

SPECIALTY SOLUTIONS

COMPLETE CLIMATE SOLUTIONS

When outages occur, processes demand precise conditions, or projects require controlled environments, you need a trusted partner for temporary climate control.

Battlefield Equipment Rentals delivers complete solutions—heating, cooling, dehumidification, and air quality management—tailored to any challenge or environment.

From safeguarding people and equipment to maintaining productivity, our expert Climate Control Team provides fast, reliable HVAC solutions across Eastern Canada.

Heating

Keep construction sites operational in cold weather, ensure proper curing of materials like concrete, prevent freezing damage, and provide temporary warmth for structures, offices, or events. Choose from various heating technologies including indirect fired, direct fired, hydronic, electric, and radiant heaters.

Cooling

Provide comfort cooling for personnel, protect temperature-sensitive equipment and processes, or deliver emergency cooling when permanent systems fail. Our cooling fleet includes portable air conditioners, chillers, and air handling units.

Dehumidification & Drying

Tackle excess moisture to accelerate drying times in construction and restoration projects, prevent mold growth and corrosion, and maintain necessary humidity levels for sensitive products or processes. We offer different types of industrial-grade dehumidifiers.

Air Quality & Ventilation

Improve indoor air quality by removing airborne contaminants like dust, mold spores, and other particles using HEPA air scrubbers. Our fans and ventilation equipment help manage airflow, expel fumes, and create safer working environments.

Expertise You Can Trust - Our specialists design tailored solutions backed by deep industry knowledge, managing projects from planning to implementation.

Extensive Fleet - Choose from a wide range of modern, well-maintained heating, cooling, dehumidification, and air quality equipment for any job.

24/7 Rapid Response - Emergencies don't wait—and neither do we. Count on fast, round-the-clock support to minimize downtime

Customized Solutions - Every industry is unique. We assess your site and needs to deliver reliable, customized climate control.

Complete Service - Beyond rentals, we provide installation, fuel supply, and removal for a hassle-free experience.

Serving Diverse Industries & Applications

Our climate control rentals support critical operations, providing essential comfort across many sectors, including:

- Construction
- Industrial & Manufacturing
- Commercial & Facility Maintenance
- Healthcare & Hospitals
- Data Centers
- Events & Hospitality
- Disaster Response & Restoration
- Government & Education

... and many more.

SPECIALTY SOLUTIONS

Grout & Bonding Agents
Battlefield Equipment Rentals carries a full line of grouts, sealers, release agents, white cures, admixtures, epoxies, forming hardware and concrete patch repair for any of your jobsite needs. For more details, call your nearest Battlefield Equipment Rentals location at 1-800-RENT-CAT.

M-Bed Standard
A non-metallic, non-shrink, gassing grout composed of cement, gassing and flow agents, and graded siliceous sand. This economical general purpose grout can be used for the installation of anchor bolts, machine equipment base plates and column sole plates.

Sika Top 121 Plus, Sika Top 122 Plus, Sika Top 123 Plus
Polymer-modified, PLUS migrating corrosion inhibitor, cementitious, two-component, fast-setting mortar.

Diamag 7
An economical, mineral shake-applied surface hardener. Special dispersing and plasticizing agents promote ease of incorporation into the concrete surface. Premixed and ready to use.

Florseal WB
An acrylic emulsion and water based curing compound. Adheres to damp concrete and seals in the moisture necessary for curing and hardening the surface. Available in clear formulation only.

NS Grout
Designed for critical use where high strength, non-staining characteristics and positive expansion are required. It is extremely flowable, and when cured, appears similar in appearance to concrete.

Diamond Clear, Super Diamond Clear
State of the art curing and sealing compound, specially designed to provide a quality cure and seal while assuring total resistance to yellowing from ultraviolet exposure.

Surflex Hardener
A quartz-silica mixture of finely graded nonmetallic aggregates, plasticizer and cement binder. An ecomonical concrete floor hardener, recommended for both interior and exterior use.

Verticoat Supreme
A one component, microsilica and latex modified, non-sag repair mortar. Designed for trowel applied vertical and overhead repairs requiring high performance.

Concrete-Top Supreme
Provides excellent durability under freeze-thaw cycling as well as reducing ingress by water and de-icing salts.

PVC Waterstops
Embed in adjacent pours of concrete to prevent the passage of water from liquid-containing structures or through foundation walls and tunnels at construction and expansion joints.

Fibre Expansion Joint
Ideal for use on highways, streets, airport runways, sidewalks, driveways, flatwork and scores of commercial and industrial applications subject to pedestrian and vehicular traffic.

DuoGuard
Release agent for all types of forms - wood, steel, fibreglass, plastic and paper, including pretreated panels and tubes. May also be used to soften concrete build-up on tools and equipment.

1220 White Cure
Ideal for application on exterior, horizontal surfaces such as highways, airports, street and curb paving - for excellent curing when protection from the sun's heat is desired.

SEALTIGHT

ENVIRONMENTAL FABRICS

TARPS & ENCLOSURES

This enclosure system is the best way to solve many cold weather problems; it is also the best answer to improving worker efficiency in areas with severe weather conditions.

EROSION & SEDIMENT CONTROL

Battlefield Equipment Rentals has many different types of erosion & sediment control products to suit almost any application.

FLOATING COVER SYSTEMS

Sizes from 7.5' to 20' deep by 50' long. Floating cover systems isolate silt or other hazardous materials while working in an aquatic ecosystem. Can assist in preventing costly environmental clean-up and liability.

GEOMEMBRANE CONTAINMENT

Polypropylene geogrids are used for high strength applications where biaxial strength is required.

SOIL REINFORCEMENT

Reinforcement Geosynthetics provide cost effective methods for designing reinforced soil walls, steepened slopes, and embankments.

CATCH BASIN SEDIMENT TRAPS

Catch Basin Sediment Traps (CBST's) are placed in catch basins to filter silt from runoff water.

SILT FENCE

Silt Fence is a temporary silt control device that helps to prevent the loss of silts from a site during rain, or other run-off events.

MANHOLE RETRIEVAL SYSTEM

Used for manhole and confined space entry and retrieval applications.

SPILL KITS

Battlefield Equipment Rentals can supply a full variety of spill kits for your emergency response needs.

RENTAL & USED EQUIPMENT

YOUR SINGLE SOURCE FOR ALL YOUR EQUIPMENT NEEDS

Rental Equipment

Battlefield Equipment Rentals offers a full range of Caterpillar machines and other tools and equipment to meet all of your jobsite needs. And, because we rent newer equipment, that is fully serviced by expert mechanics, it's ready to work when you are.
With a full range of Cat machines and name brand rental equipment… Battlefield Equipment Rentals is your one-stop-shop for all your equipment needs.

Battlefield Equipment Rentals makes equipment knowledge our number one priority. We hire and train the best people, so you get the right equipment to do the job efficiently. To handle your complete rental needs, we also sell a wide selection of specialized tools and supplies. Since there's no time for downtime, we carry the leading equipment brands and follow good maintenance practices to ensure equipment will perform reliably on your jobsite. We have a complete service department with trained service technicians.
On every rental we check it out before you rent it out. Rentals are not our only business. If you need a machine or tool for purchase, our rental experts are trained to sell everything we rent, including Cat equipment.

> Renting Is Easy. Get the equipment you need, when you need it.
> Renting Is Economical. Need a specialized tool for a specialized job? Rent it!
> Renting Is Efficient. Newer equipment, competitive rates, prompt delivery.
> Renting Is Flexible. Rent by the day, by the week, or by the month.
> Renting Is Smart. Eliminate service hassles. Before you rent it out, we check it out.
> Renting Is Versatile. From backhoes to jackhammers, we have all the equipment you need.

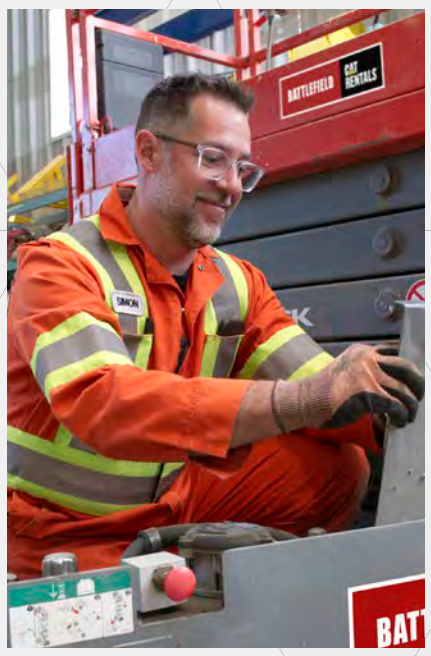

Used Equipment Sales

If you are in the market to purchase used tools or machines, Battlefield Equipment Rentals also sells everything that we rent. Please contact your local Battlefield Equipment Rentals location or Sales Representative and they will provide you with a complete list of Used Equipment that is available to you. You can also see the up to date used equipment list that is available on our web site, www.BattlefieldEquipment.ca.

LET'S GROW YOUR BUSINESS TOGETHER.

BUILD

We take care of your rental solutions and services, leaving you to build your business.

EXPAND

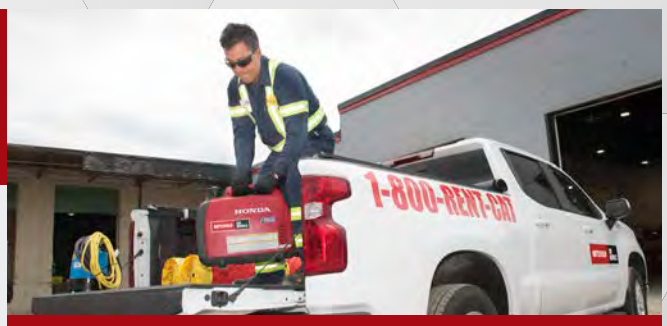

Renting gives you the flexibility you need to be efficient, nimble and ready to expand.

OPTIMIZE

We'll tailor the equipment to the job and help optimize the way you work to become more profitable.

PROFITABILITY

Whatever the scale of your operations, renting high-quality, trustworthy equipment through Battlefield Equiptment Rentals puts you on the path to growth. Renting frees up your capital and means you no longer have the overheads of equipment ownership. We promise you'll see the results in every line of your balance sheet.
