CONTRACTOR GRADE PADS

Contractor Grade products feature a robust product manufactured with a layer of spun bond polypropylene laminated in the middle of the fabric and then sonically welded together. Available in Oil Only and Universal. Pad size 15"x15" available in both single and double weight fabric.

SPILL BERMS

Spill berms are custom designed to meet customer's portable secondary containment requirements. The oil water separator is a unique way to allow rainwater to drain from your containment berms without allowing harmful hydrocarbons to be discharged.

NEOPRENE DRAIN COVERS

Chemically resistant Neoprene Drain Covers are lightweight and help prevent spills from entering drains.

PLUG N' DIKE

Plug N' Dike is a non-toxic material which forms an immediate seal to control flammable and hazardous leaks and spills.

SAR-GEL®

- Fast easy clean-up
- Easier to see water line - does not run
- Easy to apply - no messy jars
- Complete colour change from white/pink to deep scarlet
- Faster reaction - immediate detection means less time wasted

H_2OUT®-250

The impact of water contaminating fuel can cause filters to plug and cause serious damage to the engines fuel system. The H_2Out®-250 will adsorb & retrieve only water from fuel/hydrocarbon storage tanks.
