## **Environmental Fee**

To cater to the equipment requirements of our customers, Battlefield Equipment Rentals deals with potentially hazardous substances such as fuel, oil, cleaning agents, batteries, and sediment on a daily basis. The appropriate handling of these materials and their by-products is costly, but we are dedicated to safeguarding the environment and our communities. Consequently, Battlefield Equipment Rentals invests in strategies designed to reduce our environmental impact and adhere to Federal, Provincial, and local regulations. This includes containment of our potentially hazardous substances, treatment of our wash bay waste, and correct disposal or recycling of oil, filters, fluids, tires, batteries, and workshop waste.

The Battlefield Equipment Rentals Environmental Fee is not a tax or fee mandated by the government. This fee assists in offsetting a broad spectrum of environmental-related risks and costs (both direct and indirect) associated with the operation of our rental fleet, such as:

- Disposal of waste
- Recycling of oil
- Handling of fuel and fluids
- Construction and maintenance of cleaning facilities
- Treatment of our wash bay waste
- Investment in rental assets with low emissions (i.e., Tier IV)
- Reporting to the government
- Administrative expenses

This fee is not designated for any specific purpose or deposited into an escrow account. It becomes part of Battlefield Equipment Rentals' revenue and is used at our discretion. This fee is intended to be applied to each piece of rental equipment identified as having a potential environmental impact, in accordance with the groupings detailed below:

- Light Equipment: \$11 per unit
- Heavy Equipment: \$24 per unit
