

To Whom It May Concern,

I am delighted to provide this letter of recommendation for CIMCO Refrigeration, which has consistently demonstrated excellence in the design, engineering, and installation of ice rink refrigeration systems.

With over 20 years of experience in the ice rink industry, I have been intimately involved in managing operations at both NHL and practice facilities. Throughout this period, I have overseen multiple facilities equipped with various refrigeration systems installed by different contractors. In instances where a CIMCO system is in place, the difference is clear in the meticulous attention to detail, superior workmanship, and exceptional performance of the system. Even in venues with CIMCO systems that are decades old, I can rely on their enduring reliability and performance to assist in the production of the highest quality ice sheets. It is my strong belief, that in this application, CIMCO is hands down the best-in-class supplier and manufacturer of refrigeration equipment.

In my view, the ice quality at NHL practice rinks is equally crucial as at the main venues. Often a pivotal factor in game-time performance, the quality of ice significantly affects player performance, injury prevention, and overall satisfaction. Without hesitation, I would choose CIMCO as my preferred provider to deliver a quality system that meets the needs of any team I represent.

As the Director of Ice Operations for the LA Kings, having previously served with the Toronto Maple Leafs and Edmonton Oilers, I can affirm that CIMCO's steadfast commitment to excellence and their commitment to ice quality distinguish them in the industry.

Sincerely,

Kyle Lamkey
Sr. Director, Engineering & Venue Operations
Los Angeles Kings Hockey Club
