Subject: Acknowledgement of work performed

Mr. Di Genova,

The purpose of this letter is to acknowledge the work performed by your company as a specialized contractor for the implementation of our new refrigeration system at our new Longueuil plant.

Your team worked efficiently and professionally to meet our requirements. The employees and subcontractors assigned to the project were cooperative and adaptable throughout, considering the exceptional situation imposed by the pandemic. What's more, they showed great attention to detail in delivering a high-quality, safe and durable result.

While I have nothing but praise for your entire team, I would like to extend a special thanks to Francis Pilot, Sean Nicholls, Danny Venne, Éric Lachaine and Ryan Smith, as well as to all the subcontractors involved in our project.

In light of my experience on this project, I have no hesitation in referring CIMCO Refrigeration for the execution of an industrial-grade installation that is aligned with a long-term vision. More specifically, the standards of sustainability, respect for the environment and operational safety make the partnership between Molson-Coors and CIMCO Refrigeration a success.

Please share my most sincere thanks with all of you and receive, Mr. Di Genova, my most courteous greetings.

Jason Grzela
Director of Engineering and Execution, Supply Chain
Molson-Coors
