

## Mycom Smart M

The Mycom Smart M is the most efficient reciprocating compressor available.

No more guessing about how to maintain your compressor. It tells you when it's time for an oil change or overhaul and lets you know how efficiently you are operating.

The compressor is the heart of the system. It costs the most to operate. The onboard intelligence carefully monitors operating conditions, reports deviations from optimal operation, and advises on upcoming service requirements.

Sizes	Compressor	DOT Oil Separator	Discharge Connection	Suction Connection
30-60HP	N2M	DOT 8	1 1/4"	2"
60- 100 HP	N4M	DOT 12	2 1/2"	4"

- Mycom M-series compressor
- Manufactured Package
- Mechanical safety panel
- Integrated Smart Rink Connect technology

## Mycom Smart M

Smart Features	
Compressor Protect	Monitoring and notification of compressor safeties Over amperage Notification
Maintenance Scheduling	Longevity protection alarms Overhaul and maintenance notifications
Green Reporting	Monitors power consumption Provide reporting for internal energy audits
Oil Management	Constant oil status feedback Notifications of oil consumption Add oil notification
Efficiency Reporting	Heat transfer efficiency notifications Waste heat availability reporting Early warning malfunction alarms System health monitoring
Refrigerant Release Reporting	Relief valve release notifications
Easy to use interface	Touchscreen panel-mounted display Remote access through the internet Remote alarming and monitoring capabilities Easy set-up, intuitive, and no training required
