Our Standards

Current Tools has invested in state-of-the-art production equipment to ensure the tools we manufacture meet the demanding standards our customers have come to expect. We ship worldwide from our 200,000 square foot facility located in Greenville, SC, and from numerous stocking warehouses located throughout the United States.

Current Tools

FOR THE PROFESSIONAL ELECTRICIAN

Our Facility

- 200,000 sq. ft. of manufacturing space
- BLM Tube Laser
- State of the art Powder Coating System
- Robotic Welding Cells
- Mitsubishi Laser with Tower
- CNC Machining Shop
- On hand inventory allowing us to quickly process most orders within 24 hours.
- Ability to ship directly to customers desired locations

Mitsubishi Laser with Tower

Robotic Welding Cells

Tube Laser

Advantages of Current Tools

- Full engineering staff
- Continuous product development through customer input
- State of the art manufacturing equipment and processes
- Made in the USA
- 2 year warranty
- Quick shipment of product
- No drop ship fee to job site
- In-house product training
- Contractor focus groups

754 Offset Bender

- Quickly make consistent offset bends in one setup
- Bends offsets and saddles
- Drill driven for labor savings and operator productivity
- Recommended drill (provided by end user) – 1/2" variable speed cordless drill with a minimum of 18 volts.
- Speedy removal of bent conduit
- Gauge rod for repeat bends
- Folds for compact transport

BENDS: ½"–¾"–1" EMT Conduit & ½"–¾" Rigid/IMC/ PVC Coated Conduit

Optional shoe groups for bending:

- **4 pieces of ½" EMT Conduit**
- **2 pieces of ¾" EMT or ½" Rigid Conduit**

77HRB Hi-Rise Base

- Increases productivity and reduces back strain by raising the bender to a more ergonomic height
- Will fit Current Tools Model 77 or Greenlee® 555®C Bender*
- Stable, heavy-duty design
- Can accommodate multi-shoe or single shoe groups
- Two rigid and two locking swivel casters for easy mobility
- Raised design allows for larger offsets
- Convenient tray for storage
- Powder coated finish

NEW ITEM

Bender not included.

77HRB Hi-Rise Base

77HRB shown without bender

Load and unload conduit at a safe, ergonomic height

All operations are located at a comfortable position to minimize worker fatigue.

747 Omni™ Bender

- Only two shoes needed to bend 1/2" to 2" Rigid, EMT and IMC conduit. Optional shoe group bends 1/2" to 2" 40 mil PVC coated Rigid conduit
- Proven electrical control system
- All major electrical components are interchangeable with Model #77 Series Electric Bender
- Adjustable bend angle limit switch for accurate repeat bends
- Tilts for horizontal bending in a tabletop position
- Quick squeeze adjustment for conduit support rollers
- Fork pockets for easy lifting
- Lockable storage box for accessories
- Flat free tires
- Compare to Greenlee® Model 854/855
- Made in the USA

To bend 1/2" thru 2" EMT, IMC, Rigid, Rigid Aluminum and schedule 40 steel pipe. Can also bend 1/2" thru 2" 40 mil PVC coated Rigid conduit with optional shoe group.

Hand Pump and Hydraulic Hose for Knockout Sets

- Unique stainless steel and aluminum construction for light weight and rugged use
- Operates in any position
- 6,500 PSI (max) pressure
- For use ONLY with Hydraulic Knockout Sets & Cable Cutters
- Compare with Greenlee® Model #767*
- Made in the USA

SPECIFICATIONS

Oil Capacity — 16 cu. in.
Oil Volume — .069 cu. in. per stroke

Knockout Ram

- Will work with Greenlee® punches and dies*
- Proven heavy duty design
- For use only with 6,500 PSI maximum hand pumps
- Compare with Greenlee® Model #746*
- Made in the USA

Catalog Number	Description	Weight	
1521	6,500 PSI (max) hydraulic hand pump Dimensions – 2 7/8" width x 3 7/8" height x 12 3/4" length	4.7 lbs.	UPC 811993021404
1522	Hydraulic Knockout Ram Dimensions – 5 3/4" length x 2 7/8" diameter	6 lbs.	UPC 811993021411
1523	1/4" x 3' Hydraulic Hose — 1/4" NPT male fittings on both ends, one end swivels	1 lb.	UPC 811993021428

Stud Punch

- Punches steel studs up to 20 gauge
- Self-clearing mechanism to help avoid punch hang-up
- Handle designed to allow for tight clearances
- Self-centering on standard width studs
- Lightweight aluminum body
- Ergonomic handle design
- Handle designed for greater leverage
- Compare to Greenlee® Model #709 & 710*
- Made in the USA

High Speed Cable Puller 3,000 lb. capacity with Mobile Cart

- Mobile cart for easy mobility around jobsite
- Folds for compact transport and storage
- 8' reach when fully extended
- Quick release conduit couplings
- Integral heavy duty 2-speed motor
- Permanently lubricated vent free gearbox
- Integral foot switch
- Lightweight – Less than 75 lbs. without mobile cart
- 3,000 lb. pulling capacity
- Complete system – no extra parts to purchase
- Stronger, more durable gear box
- Integrated wheels
- Higher pulling capacity than competition
- Compare to Greenlee® Model #G3 Tugger® and Southwire® M3KM Cable Puller**

6,000 lb Mobile Cable Puller with 4 Wheel Carriage

- Unique design features quick one man setup
- Puller mounted on 4 wheel carriage for easy mobility
- Complete system-no extra parts to purchase
- Permanently lubricated vent free gear box
- Puller may be used on or off the carriage
- 8' reach when fully extended
- Heavy duty 2 speed motor
- Built-in foot switch
- Quick release couplings
- Convenient storage for all couplings and foot switch
- Flat free tires

Two Speed Cable Puller with Carriage — featuring ROTABOOM™ 10,000 lb. capacity

- 10,000lb. pulling capacity
- Built-in force gauge with digital read out
- One person set up
- Four wheel carriage for stability and ease of transport
- Patented 45° horizontal pivot (Rotaboom™) allows for use of puller in tight spaces
- Two speeds allow for fast pulling on low force pulls and increased torque for heavier pulls
- Boom height adjustment handle allows for easy vertical positioning of boom sections with little effort
- Snap-in couplings for quick and easy set-up
- Fits through 32" doorway
- Flat-free urethane wheels
- Compare to Greenlee® Model 6906, 6900 and 6901*

maximum pulling force — 10,000 lbs.

Cable Feeder

- Hinged upper drive to allow for easy side loading
- High grip tires can accommodate no lube or regular cable
- Dual drive motors for maximum grip on cables
- Cable separator guides cables to ensure positive grip on tires
- Heavy duty transport caster with quick release mechanism
- Variable speed control
- May be operated with remote pendant or optional foot switch
- Self-lubricating drive chains reduce maintenance
- Flat-free transport wheels
- Compare to Greenlee® Model 6810*
- Made in the USA

Can be used with SIMpull® and other cables that do not require lubrication**

Model 99 Cable Feeder Features and Specifications

Hinged for easy loading from side without disassembly

FEATURES

- Hinged upper drive with gas spring assist for ease of cable loading from side
- Each wheel independently driven for maximum pulling power
- Variable speed control
- Low voltage hand control pendant with 8' cable
- Ratcheting tension adjustment provides tension on cable from 1/4" to 3 1/2" diameter
- Removable cable separator
- Self-lubricating drive chains reduce maintenance

SPECIFICATIONS

- Weight: 345 lbs.
- Dimensions: 26"W X 42"L X 43"H
- Power requirements: 115 VAC, 15 amps, 60 Hz
- Feeding speed: 0 ft./min to 36 ft./min.
- Cable capacity:

  Cable size — .25" to 3.5" dia. max.

  Total width of all cables — 6" max.
- Maximum pulling force:
  Single cable – Approximately 250 lbs.
  All cables – Approximately 1,000 lbs.
- Maximum reel capacity – 25,000 lbs.
- Tire pressure – 50 PSI

Double Braided Composite Rope

- Composite rope gives strength with low stretch
- Pulling eye on each end
- Double braided jacket and inner core
- Made in the USA

EZ™ Rope

Low Friction — Lightweight Pulling Rope

- Significant reduction of friction compared to standard pulling rope
- Breaking strength — 32,000 lbs. Pound for pound stronger than steel
- Available in 3 lengths: 300' – 600' – 1200'
- Extremely low stretch
- Superior pulling rope made from ultra-high molecular weight fibers
- Weighs much less than standard pulling rope
- UV resistant
- Factory installed eyes on each end

Only one rope needed for all your cable pulls up to 10,000 lbs.

513 Elevator Conduit Cart

- Tilts to allow for easy access into and out of elevators and doorways
- 500 lb. capacity
- Load and unload conduit with bed in raised or lowered position
- Holds standard 10' lengths of conduit
- Will fit through standard 36" doorway
- Convenient storage tray
- Two rigid and two locking swivel casters for ease of mobility
- Powder coated finish

Line Swivels — 00505 Series

- Current Tools line swivels are constructed with a thrust bearing for tensile load and a radial bearing for bending load. They combine a high safe working load with a compact design.
- All sizes incorporate an oil seal and are manufactured from high strength stainless steel.
- Sizes 00505-020 and larger are supplied with a grease point for lubrication.
- Sizes 00505-025 and larger are supplied with hexagon Clevis Pins.

⚠ CAUTION

Line swivels are not designed to run around sheaves.

Wire Grip Swivels — 00501 Series

These swivels may be used in conjunction with any non-rotary head wire mesh grip. They will allow the wire being installed to "unwind" as it is being pulled in, but like the Rotary Heads, these swivels will not rotate under load.

Breakaway Swivel — 00550 Series

- The purpose of this product is to protect the cable being installed from overload as well as providing the function of a regular Line Swivel. Typically, they are used during the installation of Fiber Optic cable where the swivel can be pre-set to breakaway at a pre-determined load, thus protecting the fibers or the conduit.
- Breakaway pin kits are ordered separately from breakaway swivels.
- Breakaway pin load ratings are within +/-10%.
- The Swivel is constructed of stainless steel and the breakaway pins are color coded for easy identification.

Note: Breakaway pin kits not included with breakaway swivels and must be ordered from chart below.

Can-Link Connector — 00520 Series

- The 00520 Connector is used to connect two items with lugs or wire loop fittings. A common use is to connect a wire mesh grip to the pulling wire. The connectors are manufactured from high strength Stainless Steel with hardened Clevis Pins. The two smaller sizes have slotted Clevis Pins while the larger ones have hexagon Clevis Pins.

Pulling Harnesses

- Designed to pull in 2" and larger conduit
- Harness legs are 1/4" galvanized aircraft cable
- Staggered grips on each double leg harness to avoid interference with each other
- Harnesses available in long and short lengths
- Grips have 5/8" diameter opening and are supplied with 2 jam screws
- See maximum capacities listing below
- Made in the USA

Catalog Number	Description	Weight	
2502	Clevis Max. Rated Capacity – 6,500 lbs.	1.2 lbs.	UPC 811993023422

The following are MAXIMUM pulling capacities:

- 1,750 lbs. maximum when using 1 grip of a double leg pulling harness
- 3,250 lbs. maximum per double leg pulling harness when using both grips of a double leg pulling harness
- 6,500 lbs. maximum when using both (Model 2500-1 and Model 2500-2) double leg pulling harnesses
- Clevis maximum capacity is 6,500 lbs.

Pulling Grips

Current Tools *cable grips are hand-woven by experienced trades people and this guarantees a consistent level of high quality.* ***Current Tools*** *grips are reverse woven, creating a loop at the end of the grip instead of being soldered or crimped together.*

The looped pulling head is actually a separate wire rope eye which is placed inside the swage sleeve along with the wire mesh strands. The swage sleeve is then crimped forming an extremely effective anchor point for both the looped head and the wire mesh. Testing proves this is never the weakest link of the product. The flexible eye allows cable to be pulled more easily through smaller conduit.

The ***Current Tools*** *cable grips enclose the cable firmly over the entire length of the mesh. They are made of high tensile steel strands. Depending on the type of grip, the strand comprises 7, 12 or 19 wires. By selecting the most suitable strand, the tension distribution characteristics can be adjusted to suit the requirements.*

All ***Current Tools*** *grips meet the highest standards in terms of material and workmanship and we are pleased to offer a wide range of grips with different designs and eye arrangements for onsite, underground or overhead installations.*

In addition to the grips listed in this catalog, ***Current Tools*** *can also supply special products for particular fields of application. Information on these will be supplied upon request.*

Some of the grips offered in this catalog have Rotating Heads which allow the grip to rotate while not under load.

Current Tools *also offers the 00501 Series swivel, designed specifically for use with flexible eye grips, it is easily interchangeable but it will also not rotate under load.*

All capacities indicated are Approximate Breaking Strength. Each user must decide what safety factor they require for each specific operation before selecting which grip to use. Due to metal fatigue and possible in-use damage, quoted values only apply to new grips.

Please refer to the following pages for information on ***Current Tools*** *pulling grips. Line Swivels, Breakaway Swivels and Connectors suitable for use with the grips may also be found in this catalog.*

Pulling Grips — 00682 Series

TRIPLE WEAVE – ROTARY HEAD – SHOULDERS
These grips offer a Stainless Steel Rotary Head with Shoulders and Triple Weave galvanized wire construction. The shoulders help to protect the leading edge of the cable and this type should be used for heavy duty applications.

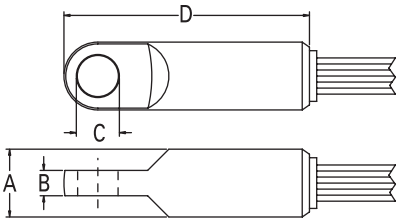

Note: The Rotating Head does not replace the use of a Line Swivel, Series 00505. There are no bearings to allow rotation under load and severe damage may occur to the cable being installed if this product is used without the correct swivel.

Lube Spreader — 00510 Series

This product is designed to spread the lubricant around the walls and along the length of the conduit, while also acting as a connector.

The body is constructed out of Stainless Steel and the polyurethane disc has angular grooves which allow better distribution of lubricant.

Table A: Spreader Disc

Spreader Disc Catalog Number	Conduit Size	Disc Diameter	Connector Body	Weight

*Safety Factor of 3:1

Conduit Checker — 08500 Series

Following initial installation of the conduit it is often found that debris or partial collapse of the conduit will impede installation of the cable.

These products are designed to ensure the conduit is clear before installing the cable.

The discs are manufactured from high density polyurethane giving them the toughness to clear the conduit without scraping or scratching the interior walls. The discs are spaced with gaps to allow passage through tight bends. The wire rope running through the mandrel is high quality, galvanized wire.
