MSA XCell Technology:

Save Time, Save Money, Save Lives

Building on years of design experience, MSA revolutionizes sensor technology with breakthroughs that improve mining application performance:

- Methane-optimized catalytic bead sensor provides increased stability over time
- Sensor response and clear times in less than 15 seconds
 - Reduces gas usage for bump testing and calibration
- Greater accuracy and repeatability within changing environmental conditions
 - Temperature, humidity and pressure
- Digital sensors offer increased RF (radio frequency) immunity
 - Eliminate false alarms from radios
- Accurate CO readings from 0-2000 ppm
- Industry-first CO/NO₂ combination sensor with wide range and fast response times
- Increased methane sensor poison resistance decreases down time and frequency of sensor replacements
- End-of-sensor life warning gives advanced notice of failing sensors
- Sensor life that greatly exceeds industry average

Technology That's Tough

Lasting Durability

- IP67 ingress protection rating
 - Dust-tight
 - Water-tight while completely submerged in 3 feet of water for 60 minutes
- Withstands extreme impacts with rugged polycarbonate housing
- Passes 20-ft drop test onto concrete
- Rubberized instrument over-molding acts as an additional armor shield
 - Available in standard charcoal color or high-visibility glow-in-the-dark
- Patented catalytic bead support wire protects methane sensor from shock

Life-Saving Performance

- 24-hour compliance tick mark display indication
 - Clear visual indication of testing and operational compliance
- Available for up to 4 gases within one small package (CH₄, CO, O₂, H₂S, or NO₂)
- Large back-lit LCD display makes measurement readings easy to see
- Loud 95dB audible horn
- Four bright LED lights on all instrument corners make alarms visible from all directions
- Selectable MotionAlert™ feature uses internal accelerometer to indicate "man down" and sound alarm
- Compatible with MSA Galaxy® Automated Test System for bump testing, calibrating, downloading, and report generation.
- 30+ hour battery run time

New optional glow-in-the dark housing for mining and confined space applications
