## JET is pleased to introduce our completely redesigned series of Locking Pliers and Locking Clamps.

The first thing you will notice is the bright blue Reverse Action release lever. Featuring more metal to metal contact and a reverse "pull up" action, these pliers are much easier to release while under heavy loads.

This is important, as the larger pliers and clamps also feature our unique 1/4" square drive hole in the adjustment screw for those times when you need to clamp work down really hard.

Backed up by the same industry-leading 9254 Steel jaw components and Chrome Molybdenum steel bodies and rivets you've come to expect from JET, and as always, you are covered by our famous Lifetime Warranty!

### QUICK RELEASE LEVER

- Reverse Action release lever is easier to operate under pressure
- Use finger to pull up on lever, rather than trying to push it down with the back of finger (painful!)

## Industrial Black Phosphate Adjustable Wrenches - Super Heavy Duty

- Chrome Vanadium steel wrenches with black phosphate finish for use in applications where plated products are prohibited
- No chrome plate to peel or chip, causing contamination in sensitive applications
- Finish is non-reflective for military applications
- Black phosphate provides superior corrosion resistance versus black oxide finishes
- Smaller 15° jaw angle provides greater leverage than standard 22° wrenches, reducing hand and arm fatigue
- Extra wide jaw openings fit an increased range of fasteners, offering greater versatility and value
- Thin tapered jaw reaches fasteners in narrow spaces with ease
